# On the Subject of Directional Button

This is the one time a Roblox knockoff is good.

- There is a button and two directional buttons on the module.
- The color and text of the button can vary.
- You must click the main button a certain amount of times before pressing a directional button.
- This module has 5 stages in total.
- Use the first rule that applies.

Step 1:

1. If the button is blue and says **Detonate,** press the main button once.
2. If the button is red, press the main button twice.
3. If the button says **Abort,** press the main button three times.
4. If the button is white, press the main button four times.

Step 2:

1. If you pressed the main button once or twice, press down.
2. If you pressed the main button 3 or 4 times, press up.
